

**VOS MONTHLY REPORT**  
May 2012

In May 2012, **283 manned and 1818 automated observations** were received in average per day from EUMETNET ships operating in the EUCOS area of interest (424 conventional VOS and 127 Shipborne Automatic Weather Stations (S-AWS)).

**EUCOS Automated Weather Stations (AWS)**

During the month, **nine BaTos AWS stations**, out of the thirteen funded by EUCOS, reported their observations onto the GTS.

Ident.	Ship's name	CC	Last rep.	nobs	Remark
BATEU00	Mary Arctica	DK	20120531	482	
BATEU01	Toronto Express	UK	20120531	483	
BATEU02	Celtic Explorer	IR	20120531	589	
BATEU03	Celtic Voyager	IR	20120526	364	
BATEU04	Nuka Arctica	DK	20120531	498	
BATEU05	Irena Arctica	DK	20120531	286	
BATEU06	Montreal Express	UK	20120531	521	
BATEU08	Naja Arctica	DK	20120531	437	
BATEU09	Urania	FR	20120531	435	

**Five BaRos AWS** stations installed on E-ASAP ships and **nine** installed on other ships reported their data onto the GTS in December.

**Inmarsat-C Half Compression deployment**

KNMI continued to deploy the half compression technique on their conventional VOS. Raw data messages sent through Inmarsat-C (Borum LES - SAC 431) are processed at Meteo-France for GTS transmission. In May, 25 conventional VOS reported a total of **1049** half compressed messages.

### Useful links

The working area of the E-SURFMAR website <http://esurfmar.meteo.fr/wikisurf-wa/> is the place where you can get a lot of informations about the programme in general and its components (data buoys and VOS). Ask the E-SURFMAR Programme Manager [Pierre.Blouch@meteo.fr](mailto:Pierre.Blouch@meteo.fr) for the password in case you forgot it. Notice you can participate in providing your own information to the PM or in writing directly on the website. This latest facility, easy to handle, may be provided to volunteers.

The E-SURFMAR metadata database address is <http://esurfmar.meteo.fr/doc/vosmetadata/> . This database contains the most recently updated WMO Pub47 metadata of the global WMO VOS fleet. Every day, extracts from the database are made available at <ftp://esurfmar.meteo.fr/pub/Pub47/> .

Monthly QC statistics and other quality control tools are available at:

<http://www.meteo.shom.fr/qctools/>

A “blacklist” of EUMETNET VOS reporting dubious air pressure values is displayed at:

<http://www.meteo.shom.fr/qctools/sevblackap.htm>

VOS operators (focal points) and PMOs are invited to check whether their ships are not in this list and to take appropriate actions to correct possible problems if any.

A list of European AWS is available at <http://www.meteo.shom.fr/qctools/last-report-list.htm>. Updated every day, this list gives for each station: its operating country; the date of its first report (after September 2004); the date of its last report - in red for those which have not reported for more than 2 weeks - ; etc...

The official E-SURFMAR webpages are henceforth on the EUCOS Web site (<http://www.eucos.net/>). Choose “EUCOS Networks” then “E-SURFMAR” in the left menu.
