

VOS MONTHLY REPORT
 April 2016

In April 2016, **184 manned and 2270 automated observations** were received in average per day from EUMETNET ships operating in the EUMETNET observation area of interest (283 conventional VOS and 143 Shipborne Automatic Weather Stations (S-AWS)).

All ship observations managed by European NMS are now sent onto the GTS in FM94 BUFR format. Native BUFR are made by Meteo-France for BaTos, BaRos, Deck Drifters and EUCAWS stations, as well as for conventional VOS using the half compression technique. Other data are the result of a FM13 to BUFR conversion. Template TM308009, presently used, should be replaced with template TM308014 within a few months. For more information...

See <https://software.ecmwf.int/wiki/display/TCBUF/E-SURFMAR>

EUMETNET Automated Weather Stations (AWS)

During April, **ten BaTos AWS stations** installed onboard ships reported their observations onto the GTS.

Ident.	Ship's name	CC	Last rep.	nobs	Remark
BATEU00	Mary Arctica	DK	20160430	80	
BATEU01	Toronto Express	UK	20160430	621	
BATEU02	Celtic Explorer	IR	20160430	497	
BATEU03	Celtic Voyager	IR	20160419	393	
BATEU04	Nuka Arctica	DK	20160427	258	
BATEU05	Irena Arctica	DK	20160430	226	
BATEU06	Montreal Express	UK	20160430	428	
BATEU07	Mississauga Exp.	UK	20160424	413	
BATEU08	Naja Arctica	DK	20160430	468	
BATEU10	Cap Finisterre	FR	20160428	572	
BATEU11	Minerva Uno	IT			Installed in Sept. 2015. Waiting for sensors.

Six BaRos AWS stations installed on E-ASAP ships **and eleven** installed on other ships reported their data onto the GTS in April. Three stations were BaRos+. In addition to air pressure, they normally report air temperature, air humidity and wind. In order to correctly measure the wind, the sonic anemometer must be well exposed. It seems this is not the case here for two out of them. Wind observations have been removed from the GTS for these meanwhile better exposures are found.

Ident.	Ship's name	CC	Last rep.	nobs	Remark
BAREU00	Atlantic Compass	EU	20160430	578

BAREU75	Horace A	IT	20160430	729	BaRos+ (MetPak-II) - Acceptable wind reports

E-SURFMAR VOS Monthly Report April 2016

The “**Deck Drifter**” put onboard French Navy ship Fulmar operating from Saint-Pierre et Miquelon (south of Newfoundland) doesn't report any observations in April.

Ident.	Ship's name	CC	Last rep.	nobs	Remark
IDDEU03	Fulmar	EU	20160309		No observations in April.

No **EUCAWS** prototype was operating in April.

Ident.	Ship's name	CC	Last rep.	nobs	Remark
EUCEU02	Lagarfoss	EU	20160106		No observations in April

Inmarsat-C Half Compression technique

Raw data messages sent through Inmarsat-C (Borum LES - SAC 431) are processed at Meteo-France for GTS transmission. Met Office also started the deployment of the technique on UK recruited VOS. In April, 9 conventional VOS reported a total of **379** half compressed messages.

Useful links

The working area of the E-SURFMAR website <http://esurfmar.meteo.fr/wikisurf-wa/> is the place where you can get a lot of informations about the programme in general and its components (data buoys and VOS). Ask the E-SURFMAR Programme Manager Pierre.Blouch@meteo.fr for the password in case you forgot it. Notice you can participate in providing your own information to the PM or in writing directly on the website. This latest facility, easy to handle, may be provided to volunteers.

The E-SURFMAR metadata database address is <http://esurfmar.meteo.fr/doc/vosmetadata/>. This database contains the most recently updated WMO Pub47 metadata of the global WMO VOS fleet. Every day, extracts from the database are made available at <ftp://esurfmar.meteo.fr/pub/Pub47/>.

Monthly QC statistics and other quality control tools are available at:
<http://www.meteo.shom.fr/qctools/>

A “blacklist” of EUMETNET VOS reporting dubious air pressure values is displayed at:
<http://www.meteo2.shom.fr/qctools/sevblackap.htm>

VOS operators (focal points) and PMOs are invited to check whether their ships are not in this list and to take appropriate actions to correct possible problems if any.

A list of European AWS is available at

http://www.meteo2.shom.fr/qctools/last-report-list_surfmar_vos.html

Updated every day, this list gives for each station: its operating country; the date of its first report (after September 2004); the date of its last report - in red for those which have not reported for more than 2 weeks - ; etc...

The official E-SURFMAR webpages may be seen at <http://www.eumetnet.eu/e-surfmar/>.
