

VOS MONTHLY REPORT May 2017

In May 2017, **201 manned and 2302 automated observations** were received in average per day from EUMETNET ships operating in the EUMETNET observation area of interest (282 conventional VOS and 135 Shipborne Automatic Weather Stations (S-AWS)).

All ship observations managed by European NMS are now sent onto the GTS in FM94 BUFR format. Native BUFR are made by Meteo-France for BaTos, BaRos, and Deck Drifters stations, as well as for conventional VOS using the half compression technique. Other data are the result of a FM13 to BUFR conversion. Template TM308009, presently used, should be replaced with template TM308014 within a few months. For more information...

See <https://software.ecmwf.int/wiki/display/TCBUF/E-SURFMAR>

EUMETNET Automated Weather Stations (AWS)

During May, **six BaTos AWS stations** installed onboard ships reported their observations onto the GTS.

Ident.	Ship's name	CC	Last rep.	nobs	Remark
BATEU00	Mary Arctica	DK	20170231	120	
BATEU01	Toronto Express	UK	20170530	433	
BATEU02	Celtic Explorer	IR	20170430	0	No obs in May
BATEU03	Celtic Voyager	IR	20170530	375	
BATEU04	Nuka Arctica	DK	20170307	0	No obs in May
BATEU05	Irena Arctica	DK	20170531	310	
BATEU06	Montreal Express	UK	20170531	501	
BATEU07	Mississauga Exp.	UK	20170531	460	
BATEU08	Naja Arctica	DK	20170425	0	No obs in June
BATEU10	Cap Finisterre	FR	20170202	33	Now EUCFR01 (1st operational EUCAWS)

Three BaRos AWS stations installed on E-ASAP ships **and eight** installed on other ships reported their data onto the GTS in May. **Three stations** were BaRos+. In addition to air pressure, they normally report air temperature, air humidity and wind. In order to correctly measure the wind, the sonic anemometer must be well exposed. It seems this is not the case here for one out of them. Wind observations have been removed from the GTS for these meanwhile better exposures are found.

Ident.	Ship's name	CC	Last rep.	nobs	Remark
BAREU12	Atlantic Conveyor	EU	20170531	493	
BAREU13	Ottawa Express	EU	20170531	581

E-SURFMAR VOS Monthly Report May 2017

One **Deck Drifter** reported data in May.

Ident.	Ship's name	CC	Last rep.	nobs	Remark
IDDEU03	Fulmar	EU	20170531	297	
IDDEU04	Sete Cidades	EU	20170420	0	No obs in May

Inmarsat-C Half Compression technique

Raw data messages sent through Inmarsat-C (Borum LES - SAC 431) are processed at Meteo-France for GTS transmission. Met Office and Netherlands use now this technique.

In May, **22** conventional VOS reported a total of **1053** half compressed messages.

Useful links

The working area of the E-SURFMAR website <http://esurfmar.meteo.fr/wikisurf-wa/> is the place where you can get a lot of informations about the programme in general and its components (data buoys and VOS). Ask the E-SURFMAR Programme Manager cmm_op@meteofr for the password in case you forgot it. Notice you can participate in providing your own information to the PM or in writing directly on the website. This latest facility, easy to handle, may be provided to volunteers.

The E-SURFMAR metadata database address is <http://esurfmar.meteo.fr/doc/vosmetadata/> . This database contains the most recently updated WMO Pub47 metadata of the global WMO VOS fleet. Every day, extracts from the database are made available at <ftp://esurfmar.meteo.fr/pub/Pub47/> .

Monthly QC statistics and other quality control tools are available at:

<http://www.meteo.shom.fr/qctools/>

A "blacklist" of EUMETNET VOS reporting dubious air pressure values is displayed at:

<http://www.meteo2.shom.fr/qctools/sevblackap.htm>

VOS operators (focal points) and PMOs are invited to check whether their ships are not in this list and to take appropriate actions to correct possible problems if any.

A list of European AWS is available at

http://www.meteo2.shom.fr/qctools/last-report-list_surfmar_vos.html

Updated every day, this list gives for each station: its operating country; the date of its first report (after September 2004); the date of its last report - in red for those which have not reported for more than 2 weeks - ; etc...

The official E-SURFMAR webpages may be seen at <http://www.eumetnet.eu/e-surfmar/>.
